

LOCUM TENENS BILLING

Network physicians may on occasion utilize a locum tenens physician to provide services in their office while they are temporarily out. It is the responsibility of the network physician to provide oversight of the locum tenens physician as it relates to services that can be performed and authorization/pre-certification requirements. Services performed by the locum tenens physician should be billed to the Scott and White Health Plan and Insurance Company under the provider name and number of the network physician who is providing oversight. It is the responsibility of the network physician to provide reimbursement to the locum tenens physician.

Please contact the Provider Relations Department, (254) 298-3064 or (800)321-7947, to advise of the name of the locum tenens physician and length of time that services will be provided.
